Ok thanks Tom, and if that's the case perhaps we would schedule a tour of those other sites for a separate occasion.

Hey Chris - I think for now we will stick with just the Lyndhurst site, but I will let you know if that changes. - T

Hi Tom – just fyi, I believe I had mentioned a potential press event with the Congressman when we start dredging the Passaic by Lyndhurst (~July), and we were thinking that we'd perhaps take that opportunity to tack on a visit to one of the Congressman's new superfund sites (Quanta in edgewater, or the berry's creek sites by giant's stadium, or even go back to garfield) on the same day – thoughts?

Thanks

I assume so also, but our press officer who made the calls is gone for the day; I have an email in to him to confirm and will let you know if he gets back to me from his bus.

Gotcha. Thanks Chris. I guess it's safe to assume Jim O'Neil from the Record?

No, we are not issuing a press release, but we did make calls to selected reporters to let them know about the results.

Subject: lyndhurst/north arlington soil sampling results

Hi all – as you know, EPA recently sampled surface soils along the passaic river, in riverside county park in lyndhurst and in nearby ballfields in north arlington, that were flooded by sandy.

As in previous similar sampling events in that area, we did find dioxin, pcb's and mercury, but at concentrations well below levels of concern.

A fact sheet and the full sampling results report are now posted at:

<http://www.epa.gov/region02/superfund/npl/diamondalkali/relateddocs.htm>

Please let me know if you have any questions – Thanks.
